SUMMARY

Motivated and detail-oriented Computer Science student with hands-on experience in AI, cloud, and full-stack development. Skilled in designing efficient, scalable systems and passionate about building technology that drives measurable real-world results.

EDUCATION

Bachelors in Computer Science Srinivas University, Mangluru	9.05 CGPA (90.05%) 2022 - 2026
Pre-University Course (PUC) Sri Gurukula pu college ,Tiptur	75.33% 2020 - 2022
Secondary School Leaving Certificate (SSLC) VVS high School ,Harpanhalli .	86.23% 2017 - 2020

INTERNSHIP

- **Full Stack Development Intern – Analogica Software Development Pvt Ltd**
Developing full-stack applications using MongoDB, Express.js, React.js and Node.js. Implementing REST APIs and responsive UI designs.
- **Web Development Intern – Cognifyz Technologies**
Created responsive web pages, integrated APIs, and enhanced site performance for improved interactivity.
- **Mearn Stack Intern – SMAGRA Technologies**
Built mobile apps with Flutter and Firebase for real-time data synchronization and intuitive UI.

TECHNICAL SKILLS

- Languages: Python, C, Java
- Web Technologies: HTML5, CSS3, JavaScript, React , Node JS
- Databases: MySQL, Hadoop, MongoDB, SQLite
- Tools: Git, GitHub, VS Code, Eclipse
- Concepts: OOPs, Power BI, Data Analytics, Cloud Computing ,Web Development ,DBMS , Agentic AI(N8N) , LLMs
- Operating Systems: Windows, Linux (Ubuntu)

PROJECTS

Cloud-Based Attendance System

- Developed a cloud-hosted attendance management platform using React, Node.js, and Firebase.
- Designed secure authentication and role-based access control, integrated real-time data synchronization, and built an analytics dashboard reducing manual tracking by 60%.

FaceTrace AI (Forensic Face Construction and Recognition System)

- Engineered an AI-powered forensic system using Python, OpenCV, and TensorFlow to reconstruct and recognize faces from partial images.
- Optimized CNN model accuracy to 92% and reduced processing time for investigative datasets.

Real-Time Face Emotion Recognition

- Built a CNN-based model using Python and OpenCV to detect and classify emotions in live video feeds.
- Enhanced real-time performance using frame optimization and GPU acceleration achieving 80% accuracy.

AI-Based Plant Disease Detection and Suggestion System

- Created a ML model with TensorFlow and Keras to identify plant diseases from images.
- Developed a Flask-based interface that provides treatment recommendations; findings published in JETIR Journal.

AI-Powered Quiz Automation System (n8n + Google Gemini + Google Forms API)

- Developed an automated workflow that generates graded Google Forms quizzes using Gemini AI based on user-defined topics and difficulty.
- Integrated Google Forms and Gmail APIs with OAuth2 authentication to create quizzes dynamically and distribute them automatically

Acute Lymphoblastic Leukemia (ALL) Detection using Machine Learning

- Developed a machine learning-based diagnostic system for accurate detection of Acute Lymphoblastic Leukemia (ALL) using medical imaging datasets (C_NMC_2019).
- Implemented advanced ensemble learning models including **XGBoost, LightGBM, AdaBoost, and CatBoost** with data preprocessing, normalization, feature engineering, and model tuning.

All-in-One LMS, Workshop & Intern Management Dashboard

- Developed a centralized platform to manage students, interns, trainers, courses, and workshops in a single unified dashboard .
- Implemented role-based access with real-time tracking of attendance, assignments, projects, and mentor-mentee mapping.
- Automated course evaluation, progress monitoring, and certificate generation.
Improved transparency, reporting efficiency, and overall training management operations.

CERTIFICATIONS

- HTML5 Application Development – Certiport
- Cloud Computing – Certiport
- Data Analytics – Certiport
- DevOps Fundamentals – IBM
- Generative AI Application Design & Development – Udemy

ACHIEVEMENTS

- Published research paper 'AI-Based Plant Disease Detection and Diagnosis' in JETIR Journal (ISSN: 2349-5162).
- Served as a Teaching Assistant for a 24-day technical workshop conducted by Analogica, supporting training sessions, mentoring participants, and assisting in hands-on project guidance.

CAREER SKILLS

Problem Solving
Adaptability
Teamwork
Communication
Time Management

AREA OF INTEREST

AI/ML
Full-Stack Development
Data Science
Cloud Computing

HOBBIES

Travelling
Trekking
Cooking
Learning New Technology
